

## ESRA 2009 conference time schedule

Generated on Monday 22 June, 2009.

	Room A2	Room A3	Room 1.2	Room 1.3	Room 1.4	Room 2.3	Room 2.4
<b>Tuesday</b>							
8:30 - 10:30	Measuring Civil Society - What are the issues?	Questionnaire Developing and Testing	Comparing and Evaluating Autoregressive, Latent Trajectory, Autoregressive Latent Trajectory, and Continuous Time ALT Models (I)	Interviewers as Agents of Data Collection (I)	Quality Enhancement in Repeated Surveys	Climate Change Survey: substantive and methodological issues	Analysing children born of war across time, nations and disciplines (I)
11:00 - 13:00	European Values Study (I)	Interviewer and Respondent Behaviour in Survey Interviews	Comparing and Evaluating Autoregressive, Latent Trajectory, Autoregressive Latent Trajectory, and Continuous Time ALT Models (II)	Interviewers as Agents of Data Collection (II)	Quality of measures for concepts of Social sciences (I)	Health Surveys in Europe	Analysing children born of war across time, nations and disciplines (II)
14:00 - 16:00	European Values Study (II)	Can multiple question testing and evaluation methods improve survey questions or predict sources of measurement error?	Analysis Strategies for Cross-Cultural Research	Fieldwork monitoring	Quality of measures for concepts of Social sciences (II)	Cognition in survey research (I)	The study of left and right in political science
16:30 - 18:30	European Values Study (III)	Nonresponse	Marginal models for dependent data	Testing Structural Equations Models	Comparative social surveys in Europe: issues in methodology and implementation	Cognition in survey research (II)	Methods and approaches for coding textual survey variables
<b>Wednesday</b>							
8:30 - 10:30	Social Indicators of Trust in Criminal Justice	Understanding nonresponse and attrition: Research from the UK Survey Design and Measurement Initiative	Causal Analysis Using Multi-Wave Panel Data: Problems and Solutions	Access to Survey Data on the Internet (I)	Implementation Issues in Internet-based Surveys	Time use surveys: emerging issues (I)	
11:00 - 13:00	Trust and Trustworthiness (I)	Non-response bias in cross-national surveys: an evaluation of Designs for detection and adjustment (I)	Methodological Issues in Multilevel Analysis for Cross-national Research	Access to Survey Data on the Internet (II)	Questionnaire design in panel surveys	Time use surveys: emerging issues (II)	IRT: Item Response Theory in Survey Methodology (I)
14:00 - 16:00	Trust and Trustworthiness (II)	Non-response bias in cross-national surveys: an evaluation of Designs for detection and adjustment (II)	Analysis and Evaluation of Survey Paradata	How to facilitate in order to compare - infrastructures for data cooperation	Methods of Evaluating the Quality of Data Collection in Surveys	Issues in Business Survey Methodology	IRT: Item Response Theory in Survey Methodology (II)

	Room A2	Room A3	Room 1.2	Room 1.3	Room 1.4	Room 2.3	Room 2.4
<b>Thursday</b>							
8:30 - 10:30	Basic Human Values (I)	Strategies for Nonresponse Adjustments (I)	New Challenges in Sampling (I)	Analysing Attitudes Towards Migration with Large Comparative Survey Data (I)	Quality Monitoring Challenges in Cross-National Data Collection (I)	Mobile Phones and other ICT in Survey Research: Implications for Data Quality	Investigating social change with surveys: problems of comparability, harmonization and cumulation
11:00 - 13:00	Basic Human Values (II)	Strategies for Nonresponse Adjustments (II)	New Challenges in Sampling (II)	Analysing Attitudes Towards Migration with Large Comparative Survey Data (II)	Quality Monitoring Challenges in Cross-National Data Collection (II)	Language, Communication, and Research in the Comparative Context	Integration of objective and subjective indicators: methodological and technical issues
14:00 - 16:00	Designing and testing survey instruments for comparative research	Detecting and Adjusting for Nonresponse Bias using Contextual and Paradata	New Challenges in Sampling (III)	Use of the Internet and Mixed-Mode Surveys to Survey the General Public (I)	Media-reported events: the context of surveys	Quantitative and qualitative approaches to validate psychological and educational questionnaires in cross-cultural research	Surveying sensitive subjects
16:30 - 18:30	Measuring the Quality of Democracy by means of Survey Data	Demonstrations of new resources	Comparing Social Survey Data in a Global Perspective. The cases of the CSES and the ISSP.	Use of the Internet and Mixed-Mode Surveys to Survey the General Public (II)	Connecting data from independent surveys	Special Issues	Data quality in surveys among the elderly
<b>Friday</b>							
8:30 - 10:30	Selection Bias in Panel Research (I)		Measurement of Social Capital		Advancements in Cognitive Testing Methodology		Macro Mechanisms and Macro Hypotheses
11:00 - 13:00	Selection Bias in Panel Research (II)		Network Survey Measurement	Enhancing Survey Methodology with Qualitative Methods	Emotional Intelligence Research	WEBSURVNET: Network on challenges in survey methodology for web surveys	Economic indicators and indices

### Other activities

Monday, 29 June 2009	17:30 - 18:30	<b>Keynote speech:</b> Peter Lynn. <i>Mixed or Muddled? Combining Survey Modes in The 21st Century</i>
	18:30 - 20:30	<b>Welcome reception</b>
Wednesday, 1 July 2009	16:30 - 17:30	<b>Keynote speech:</b> Harry Ganzeboom <i>Multiple Indicator Measurement in Status Attainment Models</i>
	17:30 - 19:30	<b>ESRA General Assembly</b>
	19:30	<b>Conference dinner</b>
Friday, 3 July 20	14:00 - 15:00	<b>Keynote speech:</b> Jon Krosnick. <i>The End of Agree/Disagree Rating Scales: Acquiescence Bias and Other Flaws Suggest a Popular Measurement Method Should Be Abandoned</i>
